

ECONOMIC STIMULUS/RECOVERY FUNDS IN 2010

The federal government indicates a possibility that it may make new funds available through a second economic stimulus/recovery package similar to the American Recovery and Reinvestment Act (ARRA) of 2009. If such an Act is approved, VDH intends to use the 2011 solicitation process for the submission and evaluation of projects potentially eligible for funding.

To facilitate awarding additional funds, if any become available, VDH intends to utilize the current DWSRF Program framework modified as necessary to meet new guidelines or requirements stipulated for the use of the funds. Additional criteria on project readiness may also apply. VDH reserves the right to extend the application period, use alternate evaluative criteria, or select projects that have already been awarded SRF base funds, as determined necessary to meet any deadlines or other requirements.

Applicants who wish to be considered for any Economic Stimulus/Recovery Funds (should any be made available) should apply under this 2011 Funding Solicitation Package using the Construction Funding application contained herein.

VDH will make information available as soon as it is released and post it on our website at: <http://www.vdh.virginia.gov/drinkingwater/news.htm>
